

Company Profile

enthios training & development ltd is a training & development company that specialises in innovation, coaching, leadership, facilitation and development. If we could sum up our work we invite people to think differently so that they act differently.

In partnership with C-Tech Innovation Ltd, we work across the North West promoting innovation within SME's through the NWDA K2i programme. Our relationship with C-Tech began in 2003 as our clients and since the K2i programme has been running (2.5 years) we have provided training in the areas of innovation (both open and closed), sales, coaching, management and leadership through the K2i initiative. This type of long term relationship is very indicative of the way we work.

enthios started trading in September 2007 it is a private limited company and held in joint ownership between Miles and Kate Peacock. The organisation began as a result of over 20 years in learning and development and a desire to create a bigger impact than previous businesses. We have 2 full time Directors and a team of 7 Associates; this allows us to be flexible both in our national reach and in the skill sets of our team. Our client base is also national and across many different sectors, we believe that this means we have a very practical and realistic approach to organisational and personal development.

The **enthios** head office is in Bamber Bridge, Preston and our associates are based nationally (UK)
